

OZONE GO MAX

VEHICLE AIR CLEANER

OPERATION:

Plug the unit into the vehicle's electronic outlet to begin the ozone cycle process. The blue LED light will indicate ozone flow, with run cycles of 2 minutes on and 1 minute off, with the unit running continuously until unplugged.

CAUTION:

In some people, minor levels of ozone exposure may cause irritation to the eyes or the respiratory system and may cause mild headache. If this occurs, move to fresh air and/or flush eyes gently with water to clear symptoms. Seek medical attention as needed if conditions persist.

2 YEAR LIMITED WARRANTY

Warranty is void if machine is mistreated or disassembled.
